

Rasco Industries' Bug Blocker Doors Offer Secure Ventilation for Your Facility

If you've ever opened the overhead loading dock doors at your facility on a hot day, you know how great the fresh air and ventilation this creates feels. But, you also realize the potential security risk this creates. To keep unauthorized persons out and prevent theft of valuable company goods and inventory, while allowing for cool, comfortable air flow, you need Rasco Industries' Bug Blocker Chain Link Security Doors or Bug Blocker Expanded Metal Security Doors.

[Bug Blocker Chain Link Security Doors](#) are easily to install in any facility. They can be added to your existing overhead door system using Rasco's unique track-switch mechanisms, or with dual track setups. Bug Blocker Chain Link Security Doors meet or exceed all Homeland Security, Food Defense, and other safety requirements. With 2-inch diamond galvanized steel mesh, these doors are rugged enough to protect your facility's major access points. They're easy to use, rolling up and down on their tracks either manually or motorized. And, Bug Blocker Chain Link Security Doors feature sturdy latches and locks to keep them closed securely at all times. Rasco custom builds these doors for any size opening, to meet customers' exact specifications. [Click here](#) and select "Chain Link Security Door Video" to watch these doors in action.

Rasco's [Bug Blocker Expanded Metal Security Doors](#) add an even greater level of security to your facility, while maintaining superb air flow and ventilation. These doors meet or exceed all Homeland Security, Food Defense, and other safety requirements. They can also be installed in your facility's existing overhead door system with dual track setups, or with Rasco's unique track-switch devices. Bug Blocker Expanded Metal Security Doors feature full industrial-grade stainless steel construction, with 3/4", 20-gauge mesh, and optional .011" 30 x 30 mesh for insect control. They can be operated manually or motorized, and include durable latches and locks for secure, reliable closure. Rasco can custom build an Expanded Metal Security Door for your facility, to fit any size opening. [Click here](#) and select "Expanded Metal Video" for a better look at Bug Blocker Expanded Metal Security Doors, or select "Bad Guys Video" to see just how safe and sturdy these doors really are.

Visit Rasco Industries' website, www.bugblocker.com, for more information about these and other fantastic products in the Bug Blocker product family. Their doors offer security, pest control, and ventilation, all in one door. Be sure to visit the Bug Blocker booth at the GovSec Government Security Conference and Expo, March 29-31, 2011, in Washington D.C.
